In 1996 through a vision, Jeanne White Eagle was given a way to work with sound that helps us remember who we are and where we come from. She was shown how to teach individuals to create new sounds, new spontaneous songs forming inside each of us that can effect change in the individual and the mass consciousness.

The practical applications include singing financial abundance to you, singing good health to you, etc.

Jeanne, who has twice experienced healing from cancer with the help of sound, will share her story and allow you to experience firsthand the use of sound vibration in the healing of our bodies, and in so doing, the healing of our planet. Primary focus will be on the physical and emotional bodies. Silent sound and long distance healing will also be explored.

About Jeanne: Jeanne is an author, teacher and visionary, who, with her husband John Pehrson, travels the world promoting Peace through sacred sound and ceremonial dance.
